ABOUT ME

A self-motivated progress driven person with high work ethics. I'm always learning new things and improving existing ones. I respect company values and enjoy taking responsibilities.

SKILLS

- JavaScript | NodeJS
- Express.JS |MongoDB | Mongoose
- JWT Auth | REST API | MVC
- React | Redux | HTML | CSS | Pug
- Git | GitHub
- SQL | MySQL

- Heroku | AWS EC2
- Python | Linux
- Website Performance Optimizations
- Data Structures | Algorithms
- Writes Readable and Scalable Code

EXPERIENCE

Full Stack Developer

VAP Technology, Feb 2019 – April 2020

Built web apps and worked on MERN Stack. Built REST APIs, model MongoDB database and React front-end, integrated back-end to the front-end and deployed to the AWS EC2. Completed tasks on time. Greatly improved user experience.

PROJECTS

My latest personal projects

Gotours   NodeJS | Express | MongoDB | Mongoose | JWT | Map| Pug | Stripe

A Touring app where people can book tours. The API is built using RESTful and MVC architecture. Implemented sophisticated error handling and security.

Visit project at https://gotours-touring-app-101.herokuapp.com/

RecipeSearch   JavaScript | Webpack | Forkify API

Cooking recipe app where people can search recipes, save it as favorites and add it to the cart.
